

Altium's IoT accelerator kit

Fast track your IoT gateway & solution development with Altium's IoT accelerator kit

Altium is proud to announce the launch of its IoT accelerator kit in collaboration with its partners. The accelerator kit enables gateway manufacturers and solution providers to easily prototype cloud connected IoT designs and then rapidly move to production

IoT accelerator kit benefits:

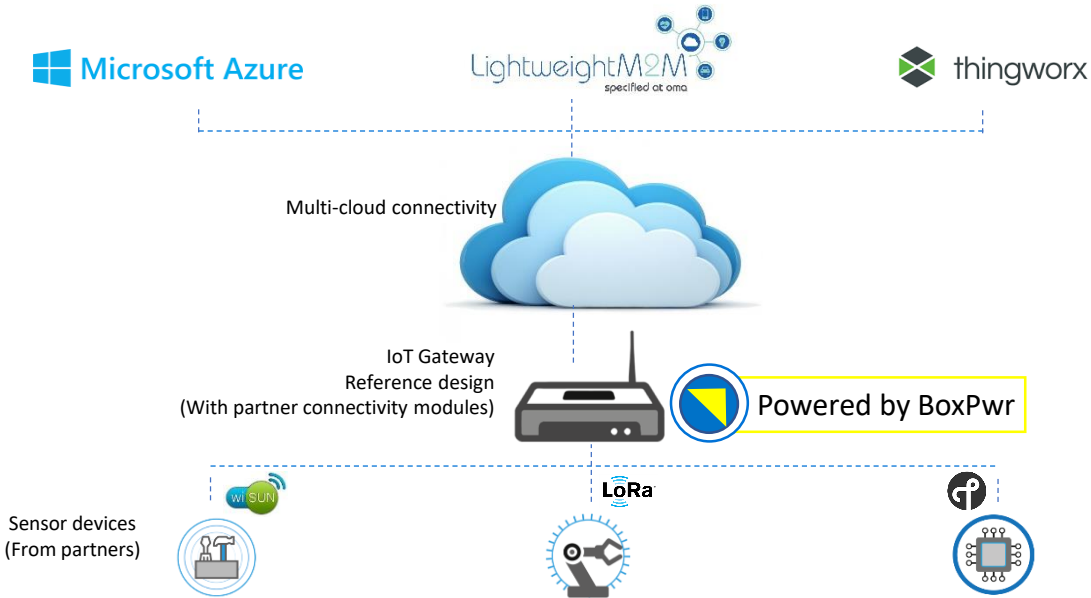

- Simple and easy - Get started in minutes and explore
- Quick and affordable – Create PoCs at a fraction of costs
- Reusable software and hardware from ideation to production
- Reliable support and services

Technical features:

- Unified south side connectivity
- Multi-cloud connectivity
- Local configuration workspace
- Converged device management and more..

IoT acceleration kit for gateway OEMs & solution providers – what it contains

IoT gateway reference design – with a powerful MPU and connectivity modules from partners

Sensor devices from partners- depending upon sensors and connectivity you need

Altium's BoxPwr software framework pre-integrated on gateway reference board
